TSH123H TONER-Bottle
TDH133 TONER-Bag

Basic information related with HP® universal toners ;

* New HP® Modals like Pro M102A+M203D + Ultra M106W are completely different technology and requires specifically designed toner, not use any universal toner for them

* If your customer is not clean the cartridges only HP® UNIVERSAL MOON -TSHMOON is okay for them

* If your customer is sensitive and aim to best possible result please suggest to use specifically formulated toners for target printer or suggest to use our flagship "STAR3 SERIES" none of any universal toner at the market could reach same properties with specifically for target printer formulated toners or STAR3 quality

* HP UNIVERSAL B -TDH67 is being widely using because of the new HP® machines mostly similar with PRO series; If your customer could be able to use for old machines like 1010-1320-4000 etc.. separate formula like HP® Star 3 - TDHSTAR3 or TDH 90 ;HP UNIVERSAL B -TDH67 is flagship for new models.

* HP UNIVERSAL U toner is our second quality toner which suggested to use against Asian toners excluding Japanese

* If your customer is using usually recharge non-virgin cartridges or recharge %100 new Chinese cartridges and not change the components ; it is better to suggest them to use HP UNIVERSAL NC (TDHNC) or as second option HP® UNIVERSAL MOON -TSHMOON
